Art Unit: 3727

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 - 9, 14 - 16, 18 - 23, and 34 - 36 are finally rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fordon.

Members #17 meet the bail handle limitation. The device of Fordon is of unitary construction.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10 - 13, 24 - 33, and 40 - 48 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Fordon in view of Overholt, et. al.

It would have been obvious to one of ordinary skill in the art to have employed the collapsible teaching set forth in Overholt in the construction of the device of Fordon, motivated by the compact storage achieved thereby. The above set forth device is unitary construction.

5. Claims 14 - 16 are finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3727

The application does not appear to disclose a container having opposed side and end walls integrally formed with a base frame.

6. Claims 37 - 39 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Fordon.

It would have been obvious to one of ordinary skill in the art to have employed a bag liner in the construction of the device of Fordon, motivated by cost. To have employed a ventilated inner container would have been obvious to one of ordinary skill in the art, motivated by the intended contents.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
